PFE ≥95%
PFE=Particulate Filtration Efficiency

50PCS

PFE ≥95%
PFE=Particulate Filtration Efficiency

This mask is for general public use only, not for medical purposes, designed to achieve a very close facial fit and very efficient filtration of airborne particles. The PFE≥95% designation means that when subjected to careful testing, the mask blocks at least 95 percent of very small 0.3 micron test particles. However, even a properly fitted PFE ≥ 95% mask does not completely eliminate the risk of illness or death.
