

FOGGING MACHINE

Portable and effective
infection control system

This handheld portable unit can be used in a range of different environments - spanning from small areas to large and even outdoors. It is of vital use in the fight against infection and can offer a truly unique sanitisation solution wherever it is used.

FOGGING MACHINE

Portable and effective infection control system

Features:

- > Liquid is atomised to create a very fine fog which binds to surfaces to disinfect on contact.
- > Multiple spray nozzles produce different size droplets for various applications.
- > Easy to carry and operate.
- > Designed for disinfecting, sterilisation, air purification, anti-virus, disease preventions, and more.
- > After using the foggers you only need to leave indoor areas for approx 60 mins afterwards and ventilated areas for only 20 minutes, before re-occupation.

Ideal for use on:

- > Hospitals, clinics & veterinary surgeries
- > Doctor surgeries, dentists & health centres
- > Schools and colleges
- > Equipment loan stores
- > Nursing homes
- > Delivery vehicles
- > Ambulances
- > Mortuaries
- > Hotels, spas & gyms
- > Internal play areas
- > Office blocks, hotels, shops, cinemas
- > High traffic internal pedestrian areas
- > Shopping malls & precincts
- > Public transport
- > Train stations / bus stations

These are just some of the clients which find this unit indispensable for sanitising whole rooms and wards, wet rooms, lavatories, bathrooms, shower rooms, lifts, stairwells and communal areas.

Spray time:	Full tank can provide up to 30 minutes spray time*
Particle size:	10-15 UM
Atomised volume:	50ml/min
Effective range:	6-8 metres
Weight:	3.1Kgs
Power supply:	AC220V/50HZ
Power:	800W

*Based on fogging with a No 1 Nozzle. Coverage would depend entirely on how the operator is using the equipment.

Consumables for Fogging Machine

VIRUCIDAL SANITISER - 5 LITRE TUB

Each 5 litres makes 50 litres of solution. Spray onto the surface to be disinfected and leave to air dry for a minimum contact time of 5 minutes.

MEDICAL GRADE SURFACE SANITISING SOLUTION - 5 LITRE TUB

Medical Grade Surface Sanitising Solution is designed to bring broad spectrum pathogen protection and biological cleanliness to large areas in an instant.

This high performance sanitising solution is independently proven effective against 99.9% of bacteria, spores, viruses and fungi including Clostridium difficile, MRSA and Norovirus.

The alcohol free, ready to use, no water formulation can be mopped, sprayed or wiped onto floors, walls, surfaces and equipment, providing easy instant germ protection to any environment where the transfer of germs is a concern.
