How do the modular
systems work?

How does the Premium Plus Clear Acrylic modular desktop system work?

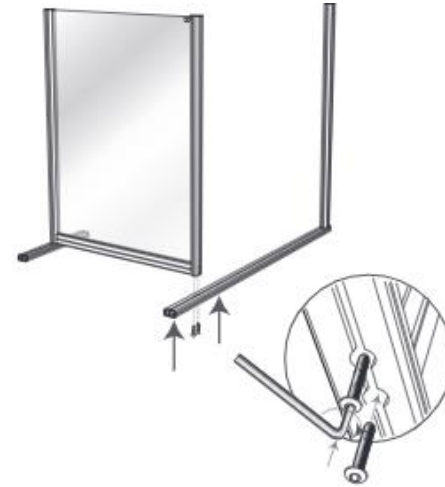

- To create the Premium Plus Clear Acrylic Modular Desktop system the consumer needs to buy
 - Standard Divider (desktop or floor standing)
 - Extensions to create the orientation desired (desktop or floor standing)

- Above is a standard desk top panel
- Depending on the configuration you wish to create you will need at least 1 extension panel

- Remove the foot from side you wish to add the extension to

- Attach the leg contained in the extension product

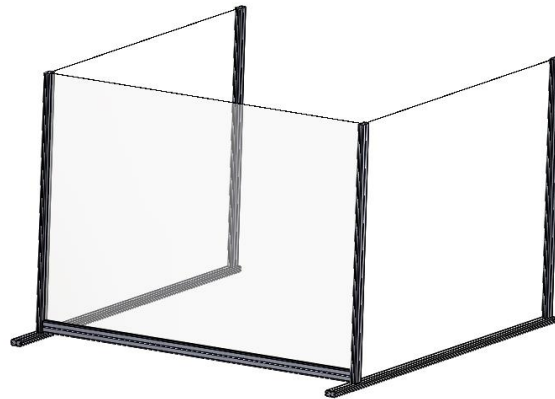

- Slide the acrylic into the slots on the legs
- *Note: there is an additional step on the floor standing dividers to attach panel along the top*

- *Premium Plus gives you maximum flexibility in orientation with minimal parts*
- *More cost efficient than Premium Plus PVC*

Example of what is needed

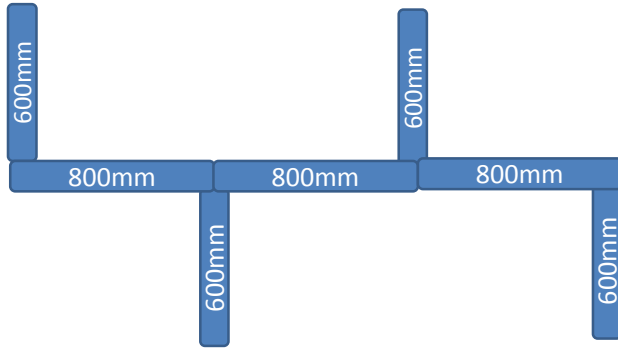

- What is needed for to create the U shaped desk screen system shown below?

	Code	Description of part
1x	1915490	Nobo Premium Plus Clear Acrylic Protective Desk Divider Screen Modular System1400x1000mm
2x	1915498	Nobo Premium Plus Clear Acrylic Protective Desk Divider Screen Modular System Extension 600x1000mm

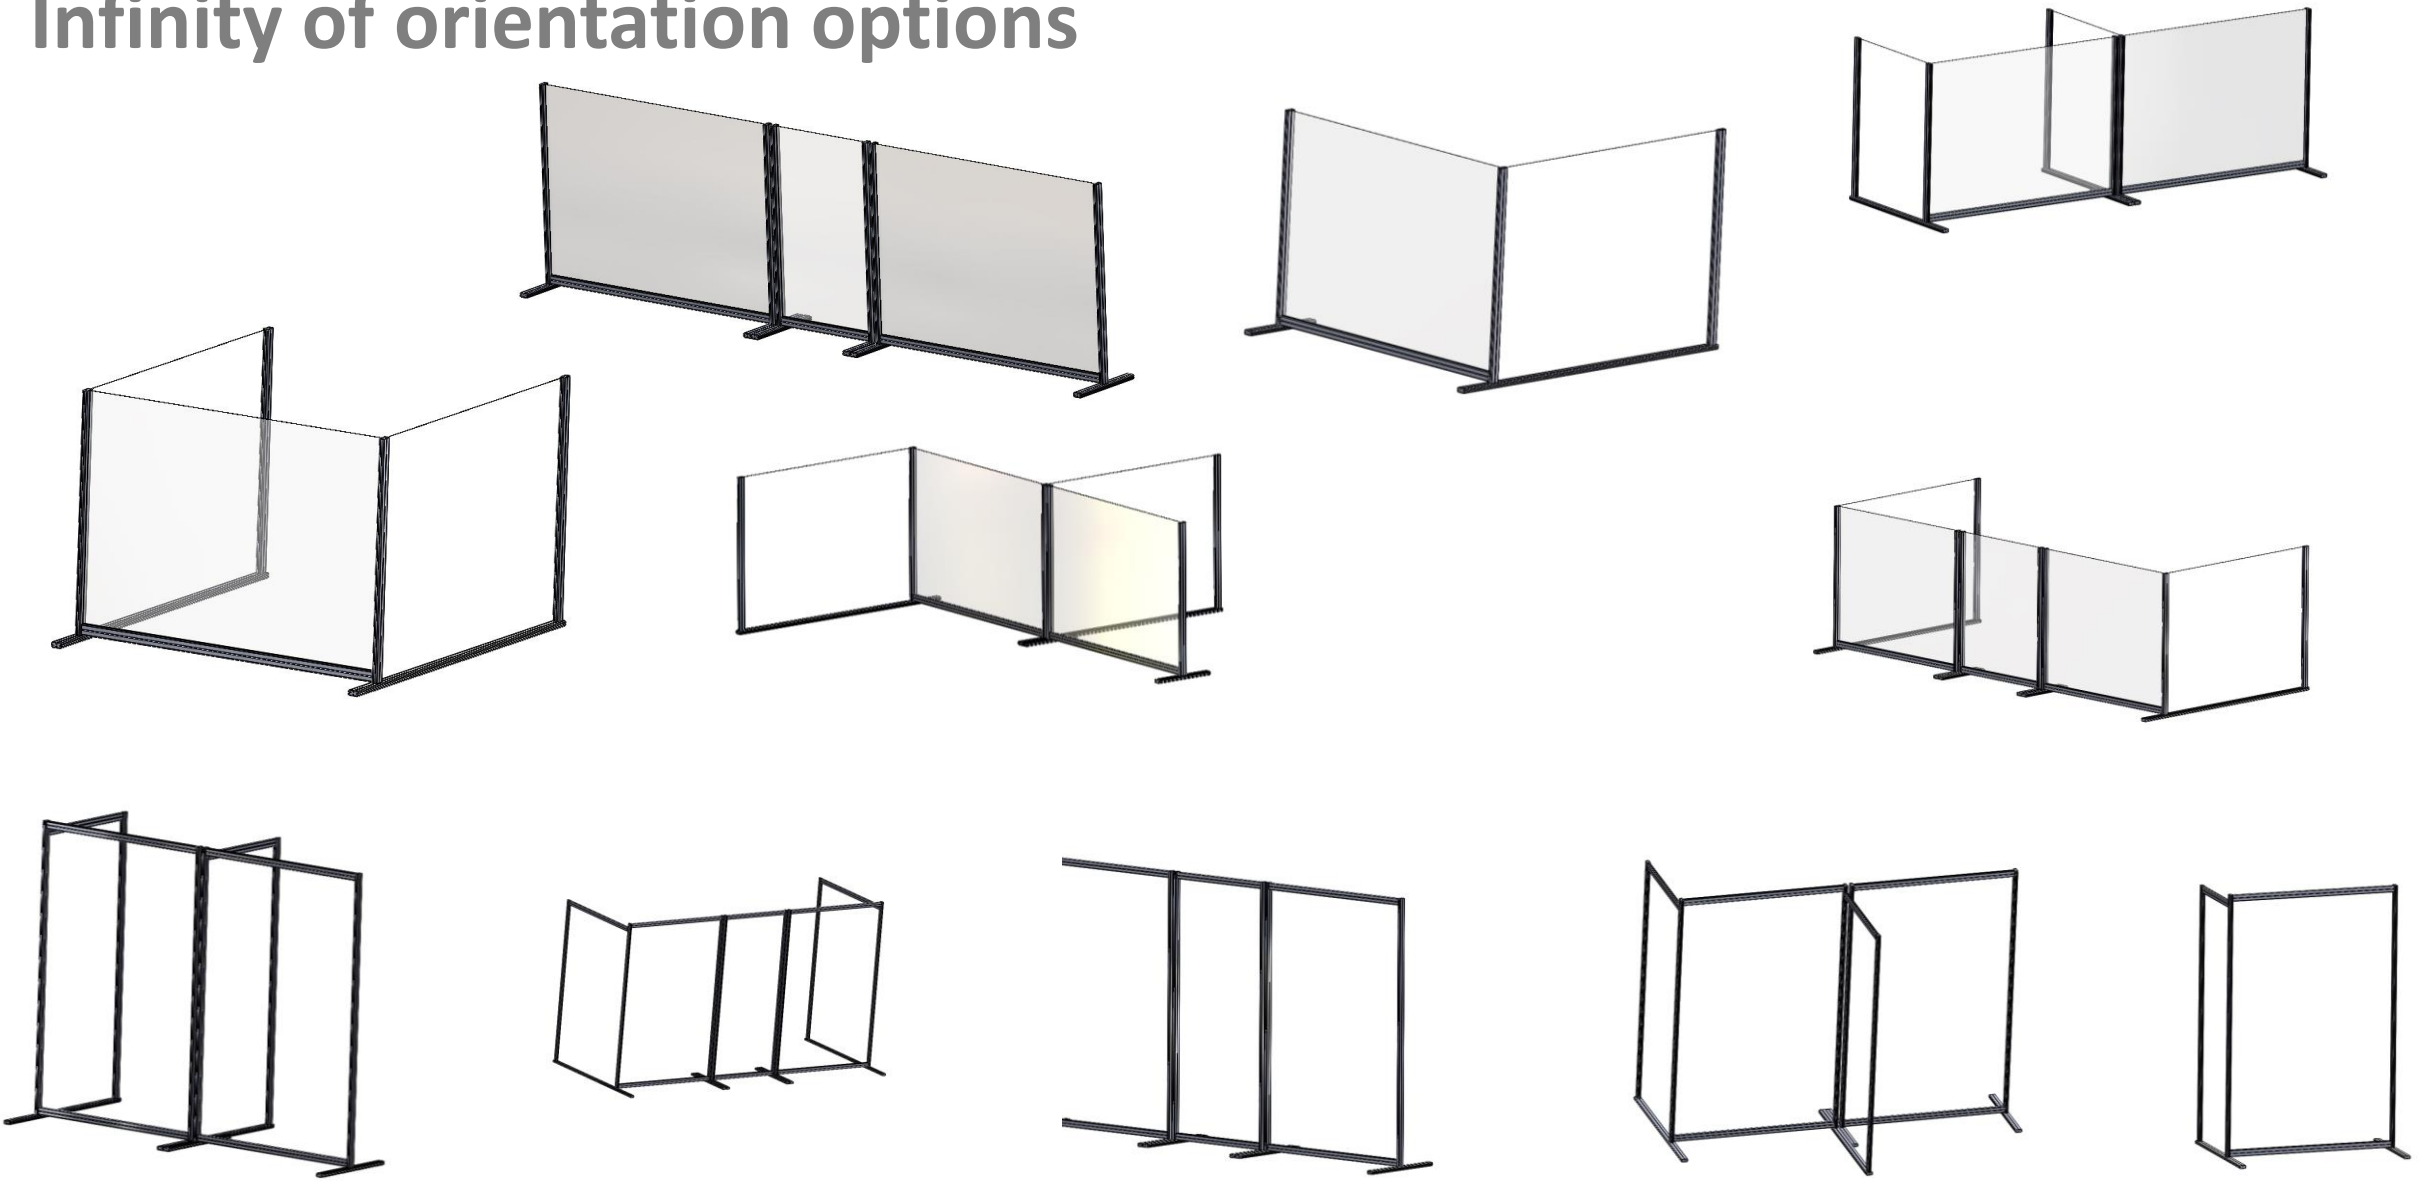

Example of what is needed

- What is needed to create staggered screen system shown below?

	Code	Description of part
4x	1915493	Nobo Premium Plus Clear Acrylic Protective Desk Divider Screen Modular System 600x1000mm
3x	1915492	Nobo Premium Plus Clear Acrylic Protective Desk Divider Screen Modular System 800x1000mm

Infinity of orientation options

How does the Premium Plus Clear PVC modular desktop system work?

- To create the Premium Plus Clear PVC Modular Desktop system the consumer needs to buy multiple items to create the orientations desired

- Above is a modular desk top panel
- Note the 2 nodules either side

- Depending on the configuration you wish to create you will need at least 1 modular leg (1915557)
- Note holes on each side

- The nodules from the panel slot into the holes on the leg and downward to hold in place

- Connect up to 4 screens to 1 leg centrally
- An additional 4 external legs also required
- Legs are required on outside edge of screen
- *Note: there are NO floor standing modular products*

To create this 3 panel orientation you will need to buy

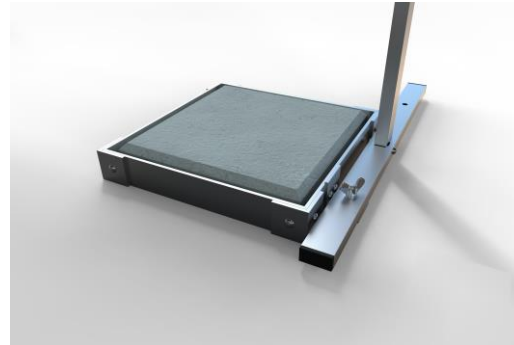

Code	Description of part
2x 1915550	Nobo Premium Plus Clear PVC Modular System Desk Divider Screen 700x800mm
1x 1915549	Nobo Premium Plus Clear PVC Modular System Desk Divider Screen 350x800mm
4x 1915557	Nobo Premium Plus Clear PVC Protective Divider Screen Leg

- Legs are required on outside edge of each screen

How do the accessories
work?

How do you use the accessories?

- There are **4 accessories** within the range
 - Single Modular Leg (15557) which has been explained on previous 3 slides
 - Castor wheels, set of 4 (1915554)
 - Desk Clamps, set of 2 (1915555)
 - Tile weight, single (1915556)

How do you use the accessories?

- Castor wheels, set of 4 (1915554)
 - These can be used on the Floor dividers to create a mobile product (Both types)
 - Simply place a wheel in each of the holes on the feet of the divider
- Desk Clamps, set of 2 (1915555)
 - These can be used on the Desk top dividers only
 - Not the modular system
 - Instead of putting the feet on the desk dividers you attach the clamp to the divider the clamp to the desk
 - Create tension in the PVC same as for standard panel
- Tile weight, single (1915556)
 - This is a 12Kg weight that can be used with the Floor dividers (both types)
 - Can be used when there are castor wheels and when there are not
 - Simply attach to the foot of the divider using the butterfly screw shown
 - Provides confidence that when using out doors the wind will not blow the divider over
