

Got it.

Return to work safely...
the solution is nobo

Back to the workplace

When preparing for the return to the work place, organisations must consider how this transition can be safely implemented. Safety and operational requirements will differ by business, actions and policies will vary dependant on ; the number of employees, space available, operational processes, how it is organised and managed.

Employers will need to effectively plan to ensure a welcoming safe environment. It will include a communication plan displaying key safety information, re-configuration of desks, equipment and shared areas, new health and safety

policies, and any new equipment that will be required. The return to the office is an opportunity to re-energize the workforce, grow productivity, innovation, ideation, rapid decision making and an enhanced sense of a community with common purpose.

The right tools which support organisations to achieve this will be essential for a seamless return to the workplace; whilst also aesthetically complementing evolving employee styles and tastes.

Key Considerations

Social Distancing Protocols

- Maintain 2 metre distance
- Define new office capacity and meeting room capacity
- Workstations respaced and oriented to reduce seating density.
- Add physical barriers within the workplace
- Office traffic systems supported by screen divider barriers and signage
- Repurpose conference and communal areas to allow for more distance
- Communicate clear instructions for shared spaces, using visual aids signage and posters

Cleaning Protocols

- Maintain the highest level of cleanliness with regular workplace deep clean
- Develop workstation cleaning protocol and consider a clean desk policy at the end of each working day
- Shared tools cleaned regularly and before every use, consider contactless or low contact devices
- Introduce air purifiers in shared spaces to help kill airborne viruses and better ensure air quality

Nobo offers a wide range of products that support effective social distancing between individuals in any environment, such as transparent or felt partition screens and modular desk screens.

Key Benefits

- **Full height barrier** - social distancing protection when seated and standing
- **Quick and easy to assemble** - no time-consuming set-up required
- **Free-standing and easy to move** - no screwing to walls or floors
- **Transparent option** - allowing clear collaboration and communication
- **Indoor and outdoor solutions** - ideal for any environment
